
7 July 2026 · recording 20260707_152258 · clock audit
71.72 s of GPS epochs take 102.09 s to reach the recorder
Recorder elapsed time
GPS elapsed time (reference)
Elapsed seconds
Receive-time pairing accumulates 30.37 s of delay; cause not established
Relative delay growth (s)
1.5 × nominal 40 ms spacing
GNSS epoch spacing (ms)
External GPS time of week − 221074.088 s (s)

Candidate measurements · 20260707_152258 + log_170
Seven measured GPS L5_Q signals · missing observations remain missing
